Warehouse and Onion drying shelter constructed

Key Agriculture performance indicators

- **Increased productivity of top two key priority crops**
- Cassava productivity increased from 24 T/ha in 2021 to 30 T/ha in 2025 — an increase of 25%.
- Bean productivity increased from 1.6 T/ha in 2021 to 1.8 T/ha in 2025 — an increase of 12.5%.
- Maize productivity increased from 1.1 T/ha in 2021 to 1.17 T/ha in 2025
- **Key Drivers of Productivity Growth**
- The improvement was supported by increased adoption of improved agricultural inputs and farming practices:
- Farmers using improved seeds increased from 35.5% in 2021 to 47.1% in 2025 — an increase of 11.6 percentage points.
- Farmers applying organic fertilizer increased from 64.9% to 89.4% — an increase of 24.5 percentage points.

Performance indicators

- Kamonyi District recorded a significant 22.1% increase in daily milk collection at its collection centers, rising from 15,368 litres per day in 2021 to 18,761 litres per day in 2025. This represents an additional 3,393 litres collected daily, demonstrating sustained growth in the district's dairy value chain and improved farmer access to milk markets over the four-year period.

GACURABWENGE- RUGOBAGOBA-NGOMA-BUYE WSS

RESTRICTED

Key performance indicators

- Access to improved drinking water remains relatively high, although the proportion of households using an improved drinking-water source declined slightly from 91.9% in EICV5 to 89.2% in EICV7, representing a decrease of 2.7 percentage points. Despite this slight decline, the current level indicates that nearly nine out of ten households in Kamonyi continue to rely on improved drinking-water sources.

No	Indicator	5 Years Targets	Achievements	%	Observation
ENERGY					
35	Km of electrical line extended	84.8	3.2	3.4%	- Karangara-Kajevuba-RWACOF (2 km) - Kona-Gishari (1.2 Km)
36	Number of new households with on-grid connection	35,000	19,040	54.4%	
37	Number of new households with off-grid connection	15,815	18,532	117%	
38	Number of Productive use areas connected to electricity	17	19	111.7%	
39	Number of new HHs acquired Gas/improved Cook Stoves	13,000	20,091	155%	

Key performance indicator

- The most significant improvement is observed in household access to electricity for lighting. The proportion of Kamonyi households using electricity (electricity from REG or other private distributors/Solar power) as their main source of lighting increased from 38.3% in EICV5 to 62.5% in EICV7, representing an increase of 24.2% points. However, electricity access remains an important area for further intervention, as more than 30% of households in EICV7 still relied on other sources
